To Whomsoever it may Concern

Subject: Appreciation letter in r/o Dr. Aaksah Tripathi, BAMS, MD and Dr. Deepak Kumar, BAMS for outstanding treatment of my mother suffering from Cerebral and Cerebellar Atrophy

My mother, Smt. Sunain Sharma, is suffering from **Cerebral and Cerebellar Atrophy** which is post incephalitis illness. In year 1996, she was attacked by Japanese incephalitis. She was undergoing medication at our home town Gorakhpur.

In August 2012, she got stroke and became totally unfit. Saliva started coming out her mouth and she was not able to move her legs. She was even not able to open her mouth to eat anything and we could just manage to give her some liquid by spoon.

In Sept 2009 we brought her to Delhi and taken her for treatment at AIIMS. We took an appointment with Dr. Manjari Tripathi (Neurology Department) on 24th Sept 2012. Dr Manjari advised for CT Brain NCCT to be done at AIIMS. After seeing the CT Brain NCCT report by Dr. Manjari, she told us that my mother's situation cannot be improved by any treatment. We returned home in hopeless situation.

After returning to home I consulted Dr. Deepak Kumar, BAMS, who is practicing at Karolbagh. Dr. Deepak consulted Dr. Aakash Tripathi, (practicing at Varanasi) and decided for the therapy. Dr. Deepak started my mother's treatment on 30th Sept 2012. He started treating by "Basti Therapy". Apart from Basti therapy he also used some other treatments.

After a treatment of about 15 days my mother started moving her legs. The saliva which was coming out of her mouth started decreasing successively and finally stopped coming out. She also started taking some chapatti. We feed her as per the diet suggested by Dr. Deepak. After some time she restored her previous condition which was impossible as per the AIIMS doctor.

The treatment given by Dr. Deepak Kumar and Dr. Aakash Tripathi gave a new life to my mother. It is one of the milestones in medical history which was made possible by Ayurvedic treatment done by Dr. Deepak Kumar and Dr. Aakash Tripathi. They have proved that the Ayurveda has potential to treat complex medical problems for which there is no solution in Allopathy.

In view of above, I wish Dr. Deepak Kumar, BAMS and Dr. Aakash Tripathi, BAMS, MD for their better future. I also wish that Ayurveda must be strengthened and enriched to provide a strong alternative system for treatment of complex diseases.

May God bless Dr. Deepak Kumar and Dr. Aakash Tripathi.

Date: 21st Nov 2012

(Pankaj Kumar Sharma)
